TECHNICAL SKILLS

Languages: Python, C#, R, SQL, Javascript, HTML/CSS, Go
Leadership: Team Leadership, Technical Leadership, Mentorship, Project Ownership, Product Strategy
Developer Tools: Microsoft Azure, Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Containers, Kubernetes
Certificates: Kubestronaut among 2746 worldwide in 2025 (CKA, CKAD, CKS, KCNA, KCSA), Certified ScrumMaster

EXPERIENCE

ActiveOps plc **JUN 2024 – NOW**

Machine Learning Engineer *Reading, UK*

- Lead technical design and implementation for all ML/AI features transitioning from prototype into production platform
- Support and triage ML/AI related production issues, ensuring high availability and reliability of services
- Establish coding standards and best practices for the wider development team to drive Engineering Excellence, by creating Python installation and style guide, code review process and CICD pipeline with Pytest and Azure DevOps
- Designed and Implemented Cloud Computing Infrastructure with Azure Container Apps, Queue services, KEDA scaling and CICD pipelines, primarily based on Container and FastAPI, allowing large scale experiments for ML prototypes, resulting in 200% faster experiment cycles
- Deployed flagship GenAI feature to provide a personalised and contextualised service to customers by explaining and improving their operation performance with operation management theory using Azure OpenAI, LangGraph, and RAG

ActiveOps plc & Henley Business School, UoR **DEC 2021 – JUN 2024**

Data Scientist & KTP Associate *Reading, UK*

- Led UK government-funded project to augment operation management software with AI & ML through Academic Research programme, Knowledge Transfer Partnership (KTP), leading to 2% reduced churn, and attracted 5+ new logos
- Led 3 flagship ML and Data Science projects, reducing production schedule by 30%
- Mentored 3 data scientists and provided technical supervision to all ML and Data Science projects
- Hosted 3+ public-facing presentations to increase brand awareness and 2 internal workshops to uplift development team's data science skills and knowledge
- Prototyped 5+ end-to-end PoC features to collect customer and internal feedback to improve customer experience and reduce time-to-market by 100% using FastAPI, Docker and Azure App Service
- Led strategic development project of an in-house Synthetic Data Generation Engine for model testing and simulations

University of Reading **AUG 2021 – NOV 2021**

Data Analytics Research Assistant *Reading, UK*

- Contributed to a EU-funded research project: D4FLY Traveller Risk Assessment with ML
- Engineered KNIME workflows for Synthetic Data Generation and Model Training of traveller records
- Communicated complex data science concepts effectively to key stakeholders, ensuring alignment and understanding across multidisciplinary teams

PROJECTS

Homelab | *Kubernetes, Proxmox, Linux, Experimentation* **2025 – NOW**

- Designed and built a Highly Available homelab infrastructure using Proxmox VE for virtualization, Kubernetes for container orchestration, Synology NAS for CSI storage, and Ubiquiti for networking
- Implemented various services including self-hosted LLM stack, media server, home automation (Home Assistant), monitoring stack (Prometheus & Grafana & Loki & Alloy)

Automated Daily Digest Pipeline | *LLM, n8n, Self-hosted, Automation* **NOV 2025**

- Automated daily digest pipelines using self-hosted LLM stack and n8n workflow automation tool to aggregate, summarise, and distribute AI and tech industry news via email

EDUCATION

University of Reading **SEP 2020 – SEP 2021**

MSc in Advanced Computer Science (Data Science) ***Distinction*** *(80.51%)* *Reading, UK*

- Dissertation: Emotion Classification via ML & NLP on Live-streaming Platform
- Designed and implemented an end-to-end ML solution with SQL and Python on Google Cloud Platform
- Formulated Emotion Index prediceted by a ML model as trackable KPI for streamers

The Polytechnic University of Hong Kong **SEP 2015 – JUN 2019**

BEng (HONS) in Civil Engineering *Hong Kong*
