Professional Summary

Senior AI Platform Engineer with experience taking AI/ML and GenAI solutions from prototype to production across Azure and cloud platforms. Combines hands-on platform engineering with technical leadership, mentoring and enablement of a 60-person development team. Delivered measurable impact, including 20–40% higher package value, 200% faster experimentation, 30% shorter production schedules and 2% lower churn. Recognised as a Kubestronaut and runs a production grade Kubernetes Cluster as a Homelab to test new technologies and build projects for fun.

Technical Skills

Languages: Python, C#, Go, SQL, R, Typescript
Developer Tools: Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Containers, Azure, Kubernetes
AI/ML: LangChain, LangGraph, Multi-Agent Workflows, RAG, Azure OpenAI, Claude Code Harnessing
Certificates: Kubestronaut among 2746 worldwide in 2025 (CKA, CKAD, CKS, KCNA, KCSA), Certified ScrumMaster

Experience

ActiveOps plc **JUN 2024 – PRESENT**
Senior AI Platform Engineer (Internal Title: ML Production Engineer) *Reading, UK*

- Lead technical designs and implementations for all ML/AI product features transitioning from prototype into production
- Establish Python coding standards and best practices for a 60-person development team to drive DevEx, by creating environment, styling and code review guidelines, and CI/CD with pytest, uv, ruff and Azure DevOps
- Architected and implemented the flagship GenAI feature fullstack with C#, Javascript and Python, using Azure OpenAI, LangGraph, and RAG, increasing package value by 20-40%
- Led Agentic Coding pilot programmes with GitHub Copilot and Claude Code. Architected an enterprise Claude Code harness using multi-agent workflows, sub-agent delegation, and lifecycle hooks; cut LLM token expenditure by 66% across engineering while preserving benchmark output quality.
- Support and triage ML/AI related production issues, ensuring high availability and reliability of services
- Designed and implemented a Cloud Experiment Infrastructure using Azure Container Apps to enable large scale on-demand ML prototypes experiments, resulting in 200% faster experiment cycles

ActiveOps plc & Henley Business School, UoR **DEC 2021 – JUN 2024**
Data Scientist & KTP Associate *Reading, UK*

- Led UK government-funded Knowledge Transfer Partnership (KTP) between ActiveOps and Henley Business School, productionising ML features that reduced churn by 2% and secured 5+ enterprise logos.
- Led 3 flagship ML projects with strategic planning to reduce re-work, reducing production schedule by 30%
- Prototyped 5+ end-to-end PoC features, working with clients actively to collect user feedback, improving customer experience and cutting time-to-market in half, using FastAPI, Docker and Azure App Service
- Mentored 3 data scientists and provided technical supervision to all ML and Data Science projects
- Hosted public-facing presentations to increase brand awareness and internal workshops to uplift development team's data science skills and knowledge

University of Reading **AUG 2021 – NOV 2021**
Data Analytics Research Assistant *Reading, UK*

Projects

Homelab | github.com/leehosanganson/homelab | *Kubernetes, Proxmox, Linux, Experimentation* **2025 – PRESENT**

- Running a Highly Available server rack at Home using Proxmox VE for virtualization, Kubernetes for container orchestration, Synology NAS for CSI storage, and Ubiquiti for networking
- Self-hosting LLM stack with llama.cpp & litellm, web servers, media servers, home automation, monitoring stack (Prometheus & Grafana & Loki & Alloy)

Factory | github.com/leehosanganson/factory | *Go, AI Factory, Harness Engineering* **2026 – PRESENT**

- Building a Software Factory using Go for agent-driven code implementation workflows

Education

University of Reading **SEP 2020 – SEP 2021**
MSc in Advanced Computer Science (Data Science) ***Distinction*** *(80.51%)* *Reading, UK*

- Dissertation: Live Streaming Emotion Index using Emotion Classification via ML & NLP on Live-streaming Platform
- Designed and implemented an end-to-end ML solution with SQL and Python on Google Cloud Platform

The Polytechnic University of Hong Kong **SEP 2015 – JUN 2019**
BEng (HONS) in Civil Engineering *Hong Kong*
