Technical Skills

Languages: Python, C#, Go, SQL, R, Typescript, Javascript, HTML/CSS
Developer Tools: Azure, Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Containers, Kubernetes
Leadership: Team Leadership, Technical Leadership, Mentorship, Project Ownership, Product Strategy
Certificates: Kubestronaut among 2746 worldwide in 2025 (CKA, CKAD, CKS, KCNA, KCSA), Certified ScrumMaster

Experience

ActiveOps plc — JUN 2024 – NOW

Machine Learning Engineer — *Reading, UK*

- Lead technical designs and implementations for all ML/AI features transitioning from prototype into production
- Establish coding standards and best practices for the wider development team to drive Engineering Excellence, by creating environment, styling and code review guidelines, and CI/CD with pytest, uv, ruff and Azure DevOps
- Support and triage ML/AI related production issues, ensuring high availability and reliability of services
- Designed and Implemented a Cloud Experiment Infrastructure with Azure Container Apps, Queue services, and CICD pipelines, primarily based on Container and FastAPI, allowing large scale experiments for ML prototypes to be run in on-demand microservices, resulting in 200% faster experiment cycles
- Architected and implemented the end-to-end development of the most popular GenAI feature to provide a personalised and contextualised service to customers by explaining and improving their operation performance with operation management theory using Azure OpenAI, LangGraph, and RAG, increasing package value by 20-40%
- Led Agentic Coding pilot programmes with GitHub Copilot and Claude Code. Designed custom workflows and coding harness to reduce 66% of cost without sacrificing performance

ActiveOps plc & Henley Business School, UoR — DEC 2021 – JUN 2024

Data Scientist & KTP Associate — *Reading, UK*

- Led UK government-funded project to augment operation management software with AI & ML through Academic Research programme, Knowledge Transfer Partnership (KTP), leading to 2% reduced churn, and attracted 5+ new logos
- Led 3 flagship ML projects with strategic planning to reduce re-work, reducing production schedule by 30%
- Prototyped 5+ end-to-end PoC features, working with clients actively to collect feedbacks, improving customer experience and reducing time-to-market by 100%, using FastAPI, Docker and Azure App Service
- Mentored 3 data scientists and provided technical supervision to all ML and Data Science projects
- Hosted public-facing presentations to increase brand awareness and internal workshops to uplift development team's data science skills and knowledge

University of Reading — AUG 2021 – NOV 2021

Data Analytics Research Assistant — *Reading, UK*

- Contributed to a EU-funded research project: D4FLY Traveller Risk Assessment with ML

Projects

Homelab | *Kubernetes, Proxmox, Linux, Experimentation* — **2025 – NOW**

- Running a server rack at Home using Proxmox VE for virtualization, Kubernetes for container orchestration, Synology NAS for CSI storage, and Ubiquiti for networking
- Self-hosting LLM stack with llama.cpp & litellm, web servers, media servers, home automation, monitoring stack (Prometheus & Grafana & Loki & Alloy)

Automated Daily Digest Pipeline | *LLM, n8n, Self-hosted, Automation* — **NOV 2025**

- Automated daily digest pipelines using self-hosted LLM stack and n8n workflow automation tool to aggregate, summarise, and distribute AI and tech industry news via email

Education

University of Reading — SEP 2020 – SEP 2021

MSc in Advanced Computer Science (Data Science) ***Distinction*** *(80.51%)* — *Reading, UK*

- Dissertation: Emotion Classification via ML & NLP on Live-streaming Platform
- Designed and implemented an end-to-end ML solution with SQL and Python on Google Cloud Platform
- Formulated Emotion Index predicted by a ML model as trackable KPI for streamers

The Polytechnic University of Hong Kong — SEP 2015 – JUN 2019

BEng (HONS) in Civil Engineering — *Hong Kong*
